AGAINST THE TORIES.

Commons.

The Speaker Casts a Bombshell Into the Conservative Ranks. Von Caprivi Imitating Bismarck's

Bulldozing Tactics.

Other Foreign Dispatches - Order Restored in San Salvador-Con-flicting Reports About the Alleged Revolt in Mexico.

By Telegraph to The Times. LONDON, June 24.- By Cable and Associated Press.] In the Commons tonight. Healy asked the Speaker to rule on the question whether there was any precedent for an earmark licensing fund. The Speaker's reply created a sensation. He made a long speech, giving the opinion that there was no precedent for such a fund, or to allow an earmarking license fund to accumulate as the government pro-posed. He thought it was a grave in-novation, which the House itself ought to decide upon.

The ruling was received with opposi-tion cheers. After further debate, the Ministers retired to discuss the Speaker's opinion. Lord Harrington and Chamberlain advised the Cabinet to drop the clause. No definite conclusion was arrived at, but it is understood Ritchie and Goschen have recog nized the impossibility of retaining the clause, and will allow it to be dropped while retaining their portfolios.

On returning to the House, Smith asked that further consideration of the Licensing Bill be postponed to give the

day they attacked a valuable load of bullion, and was guarded by soldiers, and in the battle which ensued several of the bandits were killed. Notwith-standing Gonzales's statement, the be-lief prevails here that revolutionary movements are on foot.

QUIET IN SAN SALVADOR.

Order Restored and a Provisional Government Formed. SAN SALVADOR, June 24 .- By the Associated Press.] Order has prevailed since the deposition and sudden death of President Mendez. A gov-ernment has been formed as follows: Provisional President, Gen. Carlos Ezeta; Minister of Foreign Affairs, Dr. Manuel del Grado; Minister of the Interior, Gen. Fernando Figueroa; Minister of Home Affairs, Public Credit, War and Marine, Gen. Benja-min Mollina Guirola; Minister of Pub-lic Instruction, Dr. J. Francisco As-

OMINOUS ACTIVITY. Warlike Preparations Being Made

HALIFAX, June 24 .- [By the Assoclated Press. I It is believed here that news or orders of the greatest importance have been received, as extraordinary activity pre-vailed all day at the dockyard at the north end of the harbor. All men-of-war are being victualled and coaled as rapidly as possible. Ammunition carts have also been busy all day transferring powder from the big

GENERAL FOREIGN BUDGET.

Caprivi's Attempt to Coerce the Reichstag. BERLIN. June 24.-(By Cable and Associated Press.] A spirited debate occurred in the Reichstag today over the Army Bill. Chancellor von Caprivi declared that the federal government would neither drop the bill nor accept the amendments. The govern ment could not agree to curtail the service, but he was authorized to say that a much larger number of men will be placed on the retired list in the autumn. The federal government had met the Reichstag quite far enough. He therefore urged the adoption of the bill. The debate was adjourned.

OARSMAN O'CONNOR'S GRIEVANCE. SYDNEY, June 24 .- O'Connor, the parsman, who was beaten by Stansbury yesterday, has protested against bury yesterday, has processed against the payment of stakes to the latter. O'Connor claims the race on the ground that Stansbury took his water a quarter of a mile from the start, and a foul ensued. The umpires deny that there was a foul. BERNHARDT'S ADVENTURE WITH

LONDON, June 24.—On going to her otel from the theater last night Sarah Bernhardt was unable to sleep, and decided to take chloral. By mistake she took 120 grains. Physicians were summoned and found her apparently dying. After four hours' hard work she was pronounced out of danger. NO ONE TO BLAME.

London, June 24.—The Board of Trade's finding on the City of Paris accident attribute the casualty to the wearing of the propeller bearings. It also finds that the safety of passengers insured for \$50,000.

COLLISION BETWEEN VESSELS. LONDON, June 24.—The bark Ethel, bound from London to Brisbane, col-lided off Portland today with the steamer Umbilo, bound from Natal to London. One of the Umbilo's crew and four of the Ethei's were killed by falling spars. The Ethel sank. Her crew boarded the Umbilo.

THE AMERICAN RIFLEMEN. HAMBURG, June 24.—In the pointshooting competition two Americans won prizes, but in the competition for the silver cup they were beaten by the Hamburgers.

ANOTHER REVOLUTION. LONDON, June 24 .- A dispatch from Buenos Ayres says a revolutionary agitation has started in Entre Rios and is increasing.
CHOLERA IN SPAIN.

MADRID, June 24 .- The government commission pronounced the disease in Valencia to be cholera.

THE WHEELS STOPPED.

The strikers this afternoon ordered all branches of the road in Illinois, Wisconsin and Iowa tied up. It is said not a wheel is moving north of the Ohio River.

The men insist on the dismissal of Cart Brasell whose invisitein as a specific property of the trust.

The decision after further of the decision after further of the trust. all branches of the road in Illinois,

ence with the strikers this afternoon. The men stated their determination not to return to work until Supt. Russell is dismissed. The only conclusion arrived at was that the company would resist the men's demands.

The tie-up will cause serious trouble, not only locally, but throughout a large section of country both west and south. The suburban traffic of the road is enormous—the largest in the United States. Trains run in and out of the city every few minutes from 5 o'clock in the morning until midnight, and are crowded. All the people, many of whom live beyond the cable car limits, are now thrown upon their own resources for transportation. But it is not this that will trouble the commercial world. A GREAT RAILWAY STRIKE IN PROGRESS.

Thirteen Hundred Illinois Central Employes Go Out—Traffic on the Road Suspended for a Time.

By Telegraph to The Times.
CHICAGO, June 24.—[By the Associated Press.] One thousand freight conductors, brakemen and switchmen of the Illinois Central struck last night, followed by three hundred passenger trainmen this morning. Not a wheel is turning on the road here. Everything is quiet. The strike is for the discharge of the obnoxious superintendent, Russell, and reinstatement of two minor officials.

The strikers this afternoon ordered all branches of the road in Illinois, Wilcomb Process of the controlling board.

THE COURTS.

The Grass-eaters Brought to Their Senses.

MISS TOWNER IS NOT INSANE.

Water-war Argument Still On Another Chinese Ciri Case— Serious Affair—General Court Notes.

The grass-eaters were before United States Commissioner Van Dyke yester-day for refusing to answer the questions propounded to them by Census Enumerator Edwin Clark. The defendants rejoice in the sames of William Wiederholtz, George P. Hinde and Walter L. Phales. They are vegetarians, and were arrested by Deputy United States Marshal Ralph Domin-

guez in Orange county.

The enumerator was present yesterday afternoon when the defendants were brought before the Commissioner.

Mr. Clark stated that in pursuance of his duties he went to the farm where the vectorious live and where the vegetarians live, and propounded the questions, more or less personal; which are required to be asked of citizens. The members of the colony declined to recognize the authority of any mere mortal to ask them questions and said that the

Funeral of Little Pauline Cohen Yesterday.

The funeral of little Pauline Cohen, who met her death in a runaway acci who met her death in a runsway acci-dent last week took place yesterday. It was one of the largest funerals, for a child, ever winessed in the city. At the Seventeenth-street school, where Pauline had been a favorite scholar, the school flag was hoisted at half mast, and the children decorated the dead scholar's desk with beautiful flowers. They also viewed the remain of their schoolmate at the residence of her parents. The floral offerings were per parents. The mota varieties of the Vienna bakery sent a magnificant place representing the "Gates or the Vienna bakery sent a magnin-cent piece representing the "Gates Ajar," surmounting which was a beau-tiful white dove with outspread wings. Rev. Dr. Blum officiated and conducted the services in a very impressive and beautiful manner. Much sympathy is expressed for Mr. Cohen and his family at their sad loss.

WHITE'S CASE.

HE IS CHARGED WITH ASSAULT TO MURDER.

Ball Fixed at \$5000-The Condition of Mrs. White the Cause of Grave Alarm-She May Die.

The case of Clayton White, the attorney arrested Monday, on a charge of cruelly assaulting his former wife, at her residence on Boyle Heights, Sunday, took a more serious turn

of the United States Government to pry into their affairs.

When called upon to state their side of the case, the vegetarians stated that they are aliens, and do not understand the census laws of the United States. Since their arrest they have learned the scope of the authority of the officers sent around to collect infinitesimal statistics, and expressed themselves as perfectly willing to answer any questions that might be propounded to them.

District Attorney Cole could not see that their tardy recognition of the Government's authority was the correct thing, and did not accede to a request to dismiss the proceedings.

Commissioner Van Dyke, after hearing the evidence in the case, held the vegetarians to answer to the charge brought against them. He fixed their bond at \$100 each.

The bond was given and the defendants were released, to come up for trial later.

Some time ago Mary E. Towner of Santa Monica was brought up for insanity, at the instance of a brother, and was sent to Stockton. She was afterward released through the efforts of another brother, and yesterday be matter came up before Judge Clark on an application by another brother, C. E. Towner, for the guardianship of the unfortunate lady.

Evidence was introduced before the court that Miss Towner, while not insane, is sufficiently deranged to make it necessary for her to have a guardian. The applicant was, therefore, appointed quardian.

The applicant was, therefore, appointed quardian.

his published statement of the correct one.

In regard to the assignment of the judgment to Floyd, an account of which was published in THE TIMES yesterday morning, White makes the following statement:

There are two sides to liverery story. I find another sensational article about my private affairs in the city papers again this morning, which is rule of errors. It never tains but it pours. This vexes me, but my private affairs in the city papers again this morning, which is rule of errors. It never tains but it pours. This vexes me, but my

The argument was continued yesterday in the case of the City Water
Works Company vs. Stern, before
Judge McKinley. This is the case in which Mr. Stern seeks to obtain a franchise from the city for the erection of new works in the city.

The plaintiff brought sult to enjoin the city from granting any franchise, claiming an excinsive franchise for supplying it with water by virtue of the agreement heretofore made. The case has come up on a demurrer by the defendant, protesting against such an interpretation of the contract.

The plaintiffs are represented by Messrs. Bicknell & Denis, and Messrs. Graff, Gibbon & Creighton, and the defendants by Messrs. Chapman & Hendricks and R. H. F. Variel, Esq. The arguments have brought into the case a large number of decisions on similar questions, and both sides were armed with piles of legal tomes to lend strength to their theories of the law in the case.

Yesterday morning F. Worthington was arraigned before Justice Savage upon the charge of cutting W. W. McArt. An account of the affair was published in yesterday's Times. The nature of McArt's wounds proved to be more serious than at first supposed, and there is a probability that he will die. Under the circumstances Worthlington was a probability that he will die. Condition of the Injured S. P. Section Men.

NO HOPE FOR TWO OF THEM

Changes in the Cross Road Mai agement-Atlantic and Pacific Extension - San Jose Meeting.

All four of the section men who jumped from a handcar that was standing on a trestle fifty feet high on Dr. Ainsworth of the Southern Pacific Company, who dressed the men's wounds when they were brought to this city, was seen late yesterday after-noon and made the following state-ment regarding the condition of the

ray, whose back was broken, may live several days, but he cannot recover. It is a wonder to me that all of them were not killed at once."

The accident was discussed among railroad men yesterday, and they are all puzzled to understand what Sullivan was thinking about when he allowed the men to jump from his car. The men who made the leap are divided in regard to how close the engine of the freight train came to their car. Some of them say they did not jump until the engine struck the car, while others say it stopped within three or others say it stopped within three or four feet from the car. The fact of the matter is, all of them were rattled and did not know what they were doing. The engineer had his engine under perfect control when he first saw the handcar, and as he was going at a rate of only six or easyn miles an hour! of only six or seven miles an hour it would have been easy enough for the men on the handear to turn back and keep out of the way of the freight train until they got off of the trestle. It is one of the most peculiar accidents known to relived men. known to railroad men.

It is reported in railroad circles that the Santa Fé Company has placed a gang of surveyors and graders on the proposed extension of the Atlantic and Pacific from Mojave to San Francisco. When The Times stated a few weeks ago that work en the extension would be commenced soon, quite a number of railroad men hooted the idea, and the local officers of the company decigared that they had not pany declared that they had not thought of anything of the kind. At that time they were securing a right of way through the San Joaquin Val-ley, and from the way they are going to work it is evident that they intend to push the road through as rapidly as possible. It is estimated that they will complete the road inside of fifteen

THE SAN JOSE MEETING. Tomorrow there will be quite an important meeting of Southern California en in San José. The meeting was men in San Jose. The meeting was called by Santa Barbara capitalists, who wish to form a railroad company with a capital of \$10,000,000 for the purpose of constructing a coast line between Los Angeles and San Francisco. About two hundred delegates from the various boards of trade of Southern California have been apfrom the various boards of trade of Southern California have been appointed, and a majority of them will be present. The Santa Barbara people are very much in carnest, although there are few rallroad men who take any stock in the scheme. The people between this city and San Francisco along the coast have done all in their power for some years past to induce the Southern Pacific Company to complete its coast line, but for some reason the company has held back and refuses to complete a gap of only a few miles. Local railroad men are of the opinion that the citizens of Santa Barbara simply intend this move as a bluff to compel President Huntington to complete his road during the coming winter. During Mr. Huntington's visit to this city a couple of months ago, he was questioned in regard to the completion of the coast line, and he stated that he would take it up as he could reach it, and the chances are that the Santa Fé's move from Mojave will do more to hurry him up than anything the Santa Barbara people can do.

The Inquest on the Body Yesterday

—The Verdict.

Coroner Meredith yesterday held an inquest on the body of Annie Winship, the courtesan who committed suicid at the New Arlington lodging-house. ing, by taking an overdose of mor-phine. But three witnesses were examined, the clerk of the house, Police Officer Rich and Dr. Wing. The clerk testified that the woman had occupied a room in the house before; that she engaged a room there that day,

engaged a room there that day, and that nothing unusual was noticed until she rushed out into the office and declared that she had taken poison, showing him a box which she said had contained it. He gave an alarm, notified the police station, and sent for officers and physicians, and did what he could for the woman.

Officer Rich detailed what he did in trying to get the woman to take an antidote, saying that she refused, and told him that she had trouble and wanted to die. She refused to give her real name, saying that it was not necessary, and that Annie Winship, by which she was known, would do.

Dr. Wing testified to his efforts to save the woman's life, but that she was beyond recovery. He stated that he believed she took poison, and that the dose must have been a very large one.

The jury returned a verdict that the deceased, Annie Winship, aged 25 years, came to her death from an overdose of morphine, taken with suicidal intent.
The funeral will take place this afternoon from Orr & Sutch's, on Spring street.

A Rich Chinaman and His White Wife.

Quite a flutter of excitement was caused among the boys at the Wolfakill depot yesterday, when the west-bound train pulled into the station and a Chinaman jumped from a Pullman car and assisted a well-dressed lady and two white children from the car. At first the boys thought the Chinaman was the lady's servant, but from his affectionate manner they were soon convinced that their relations were quite intimate.

The inquisitive ones gathered around the strange quartette and began to question them. They soon discovered that the Chinaman was the husband of the lady and the father of the two children. The Chinaman was dressed in regular Chinese style while his wife and children were dressed in the latest New York styles. The Chinaman is a rich contractor at El Paso. He married his wife in New Orleans.

An Interesting Case to Come Up Be fore Judge McKinley This Morning-A Rather Involved Affair.

Two boys, aged 6 years, twins, were in the County Jail last night. Their temporary residence with Capt. asserted by any one else, but Mrs. Reynolds disputes the claim.

The boys were unable to state the nature of the case to a TIMES reporter last night, and a visit was made to Mrs. Reynolds. She lives at No. 1414 Weyse street, near the old San Fernando depot, and keeps a laundry. She is an old lady, and was very much distressed about her wards.

The mother, she stated, lived formerly in Texas, at Fort Worth. At that time she was a servant in the family. One of the daughters loved not wisely but too well, and the boys, Roy and Roscoe Bassett, were the fruit of the illicit union.

But too well, and the boys, key and Roscoe Bassett, were the fruit of the illicit union.

The mother came to Los Angeles, and the faithful woman followed them. The mother married a man named McIntyre, and the children finally dritted to her. She took them, and for some time has cared for them and served the necessities of a mother. The little fellows remained contented enough until a few days ago, when the mother announced that she was about to go to Sait Lake, and wished to take the boys with her. Mrs. Reynolds did not think that it would be a good plan for them to go with the mother, whose course had not been in the straight and narrow path. She objected to the plan, and yesterday the writ of habeas corpus was sworn out.

The boys, who are interesting little onaps, were taken up to the Goouty Jail, and the merits of the case will

Quarterly Conference Meet Kicking About the Bridge The efforts put forth for a new bridge across the Arroyo Seco amounted to nothing when placed before the Council for action. It has \$1000 of the citizens' money to expend on the Fourth of July celebration, but nothing to ward making permanent improvements

The question of the Council donating \$1000 of the people's money for celebrating the Fourth, or any purpose other than for legitimate uses, is caus-ing considerable comment, and is a point that will be looked into. There was a dance in José Nadeau's Alameda streets, and considerable liquor was taken aboard by at least two of the male participants. Shortly after 10 o'clock Ramon Tenison and Francisco Acosta engaged in a quarrel over one of the women, when Ramon drew a knife and slashed Acosta over the right temple, cutting a gash three inches long. THE CENSUS. Funny Things in the Office of the Supervisor.

Some funny things happen in Supervisor Mosher's office when people, who think the enumerators have skipped give their names in. Yesterday a lodging-house man came in and informed Mr. Mosher that he had a family of fifty at his house and the enumerator had not been near them. The district in which he lives was looked up, and the very first name on the list proved to be the gentleman's family. One of his numerous family had given in the names and failed to inform him. In nine cases out of ten, when people who come in and say their names have not been taken, a look through the enumerator's books proves that they have been counted.

Mr. Mosher stated yesterday that he will not complete his work for another month. There are quite a number of enumerators in the field in this city yet. give their names in. Yesterday a

Yesterday at the university was the students' own day. The seniors, with the help of other students, erected a stage at the top of the outside stairway, covering the stairway with a mass of flowers and greens, and otherwise decorating the building. From the flag-pole streamed a large flag of purple, with a star and the figures '90 in gold, purple and gold being the class color. Over the front entrance were the letters, "Every day'll be Sunday by and by." Chairs were placed on the campus, about the stage, and when the class-day exercises commenced at 3:30 the seats were filled and some of the audience was standing.

Reed, the funny man of the class, executed an astonishing feat consisting of a faithful imitation of the song of the mockingbird. This was done without the aid of any instrument beyond the usual whistling apparatus with which nature has provided every boy.

The "Class History," by G. D. Christy, followed. While sober in the main, it contained several telling jokes on local offairs.

Paul Arnold's oration, "Shall Utah Be Admitted to the Union?" was altogether serious. It was a statesmanlike discussion of a living issue.

The class then sang another chorus, the words of which, as indeed of all the songs, seemed to have been composed for this special occasion, and contained many good hits on college affairs.

affairs.

Then came one of the funniest things on the programme. E. A. Reed, with becoming gravity, announced to the junior, Mr. Lhoyd, that the seniors were about to present him with a memento consisting of a senior plug hat. Mr. Lhoyd arose to receive the gift, when, at the critical moment, a huge plug hat, almost a yard in height, was thrown over his head. Down went the hat over the junior's head and shoulders, and presently the head of the receiver of the gift appeared sticking through the crown. After extricating himself from his novel situation he accepted the gift in a graceful speech, after which the seniors sang:

Then came the class prophesy, which was read by Miss May E. Curran. It was written on yards and yards of paper, which were served out of a washboiler through a clothes-wringer, C. A. Bradley turning the crank.

Clarence Dougherty then presented the college with an elegant Bible for the chapel desk, and Dean Cherington accepted it in a ringing speech.

The next funny event was the presentation of diplomas. These were issued to the class by themselves, were written in English and were in keeping with the other humorous pranks. Lastly, the class conferred unheard of degrees upon themselves and ended by singing "Nellie was a Lady."

THE CONCERT.

THE CONCERT. At 8 o'clock the music department gave its annual concert. The chapel was packed by an enthusiastic au-dience. The walls and stage were was packed by an enthusiastic audience. The walls and stage were handsomely decorated with palms, cattalls and pictures of the composers. On the stage were an upright piano for accompaniments and a Weber grand piano for great brilliancy, which was used for the instrumental numbers. The young lady pupils were in the majority among the performers, and they looked very pretty in their light evening dresses.

The programme was an excellent one, and the numbers were well rendered. A large proportion of the pleess, both vocal and instrumental, were rendered from memory. Comparisons, especially of amateur performers, are odious. Suffice it to say, therefore, that the entire performance reflected great credit on the teachers, Miss Leila Breed, teacher of voice, and Mrs. Coe, teacher of piano.

The full programme, as published yesterday morning, was given, with the exception of the third number of the second part, when "To the Clouds," by Miss Maud Snook, was substituted for Kucken's "Heaven Hath Shed a Tear," which had been set down for Miss Grace Whitehorn; that lady being unable to appear.

After the concert Mrs. Coe bade farewell to her pupils and many of her friends. She leaves today for a visit in Alameda, the home of her parents. About the end of July she will sail for Europe, to continue her studies in Germany, spending two years there. She will study next winter in the Royal Conservatory at Berlin.

Miss Breed is also to leave shortly for the Fest where will devete her.

First, being purely vegetable, it is (unlike mercury) not cumulative in the system, being casily carried off by the digestive processes; and second, its effective with a less quantity of the cathartic principle than has hitherto been attainable. It in this respect ranks as a discovery, and approaches the ideal, viz.: the least medicine consistent with the greatest good. As "people take laxatives indiscriminately, it is important for them to know at least one that is safe for continuous use; hence this communication. Chiso Champion.]

The mountain sections of Southern California are being gradually peopled and their great worth proved, not only as to minerals, but as to grains, fruits and vegetables. The Champion is again reminded of this fact by the receipt of a box of delicious cherries grown by James Birch in Yucapai Valley, in the San Bernardino Mountains, about twenty-five miles from Redlands, at an elevation of over five thousand feet. These cherries are not excelled in flavor and solid meat by any grown on earth. The crop is certain—at least for several years past Mr. Birch has—had full crops of good fruit each year. After paying all expenses the net profits run into hundreds of dollars per acre. He has netted three hundred dollars from a single acre of black-berries, which he sold to a San Diego commission firm. Every year for several past he has netted from two to three hundred dollars per acre on apples, and the quality of them, like that of the cherries, is unsurpassed. He has kept several kinds in sound condition for ten, and some twelve, months.

Six miles west of Fresno one rancher is harvesting 2700 acres of wheat and barley. The wheat yields thirty bushels per acre and the barley forty.

THE railroads of the country furnish a pretty good barometer of business. The prospective work of the great lines of railways is indicated by the large number of new cars ordered. The ansylvania made one order of 10,-000 cars for the Pennsylvania lines west of Pittsburgh last week. The Union Pacific has ordered 5000, the Missouri Pacific 3000, the Baltire and Ohio 4000, the Hocking Valley and the Ingalls syndicate 2000 each nd the New York Central 8000. POSTAL TELEGRAPH FACILITIES.

A Washington dispatch states that Postmaster-General Wanamaker and Gen. Bingham, chairman of the House Postoffice Committee, have been investigating last week, in connection with the postal telegraph scheme, the operations of a printing telegraph com-pany of New York. This company been temporarily operating a wire between Washington and Boston. and its practical work has been a great success. The system is that of transmitting printed characters. In other words, by the operation of a typewriting machine in connection with the wire in Boston, a similar machine in Washington printed out the messages. At all the connecting points messages can be sent in the same way. It is, in brief, an electrical typewriter, by means of which the essage is printed in the presence of the transmitting operator and a dupli-cate of the same is printed at all receiving stations on the line. The Postmaster-General expressed the opinion that it would be just the thing for the working of a limited postal telegraph scheme such as he proposed. But it does not look as though the House committee intends to give him an opportunity to contract for a postal telegraph in any way. Gen. Ketcham, a member of the committee, when asked why the bill was not reported replied, "Because there is no public lemand for it.'

It is probable, however, that a public demand would soon be developed. if the people were educated upon this question. There is no doubt that the system proposed by Mr. Wanamaker would soon become very popular and lead to a demand for its extension. In several European countries the postal telegraph business has worked to perfection. The service has been much cheapened and telegraphic communication has largely taken the place of the mail in matters of importance

There are forty thousand postoffices n the United States today having no telegraph service. It is claimed that many of the offices now reported to exist in this country for public service are not in condition to transmit the business of the people living at those stations; that they are merely adjuncts making a little income for the tele-graph company without any special acility to do the business of the lic. In most of the small railroad stations the railroad company maintains a cheap operator, who is, in many cases having only a limited vo cabulary. Besides this, railroad work the precedence at such stations and a private message may remain or the hook for several hours. Such service as this is practically worthless so that many cities of from fifteen hundred to two thousand inhabitants are practically deprived of the use of the legraph. If in these small towns a postmaster

pacity as a telegrapher the business would be done much more to the interest of the public.

The question is one which must come up for public discussion before long, and it is time that the people began to look into the subject.

NATURAL GAS DEPOSITS

The wish is frequently expresse that a liberal supply of natural gas could be discovered in this section. It would undoubtedly create a great searches are to be relied upon, such a boom would be ephemeral. cent issue of the Arena, Prof. N. S. Shaler, in the course of an article on this new fuel, thus discusses the proba bilities of its duration:

a final vote taken in the House this afternoon upon the report.

The Postofice Appropriation Bill, as reported to the Senate, appropriates 572,461,699, an increase of \$473,000 over the amount appropriated by the abill so through the interstices of the grains which compose the rock in which it is contained, the pressure, and consequently the amount of gas discharged, steadfastly diminishes from the day the well gives access to it. The rate of this decrease varies, as may be conceived, according to the permeability of the rock and the original amount of the pressure; but in the end the supply from every well is exhausted. New wells in the neighborhood may, if at sufficient distance from the original boring, give access to other parts of the field, but in a relatively brief time a large area must be exhausted. At the existing rate of demand for these light and heat-giving gases, it is doubtful if in fifty years from the present time they will have any place in our economies, and in the regions of most extended consumption, as in Western Pennsylvanis, it seems quite certain that the exhaustion of the store will be accomplished in much less time.

We shall be able to get along very well without natural gas if we can only secure a good supply of cheap coal from Utah or from British Columbia. Meantime there is plenty of room for development in our petroleum

THE British government got about \$500,000 out of the English estate of the late J. S. Morgan, which amount to \$11,000,000. The first duty was the probate stamp, which cost \$350,000. Another tax amounted to \$40,000, and as Morgan had left a year's salary to every person in his employment, and department of this city to pick up that there is a tax of 10 per cent. on each of these bequests as well as a tax of 1 obtain a pass from the Southern Pacific per cent. on the bequests to his chil-for the undesirable immigrant, and dren, and 3 and 5 per cent. to other relatives, another \$110,000 was almost made up. Of course it will not be considered news here that Stanford's seat in the Senate was bought and paid for any more than it would be news in California. I understand that the Senator himself does not affect to deny the fact now, but merely claims that the deal was performed by some of his wicked friends without his knowledge or consent. Undoubtedly every detail of the purchase should not be given to understand that if they refuse to put in hay in the nated against, and whether rations should not be altogether refused to able-bodied Indians who, in the haying season, refuse to put up hay to feed the beef cattle for tribal benefit only. Mr. Belt's suggestion is very pertinent.

wicked friends without his knowledge or consent. Undoubtedly every detail of the purchase is known, and, I presume, should Stanford continue to have his name pressed for reflection and by the same wicked friends who so conveniently acted before, the general opinion would be that, as Stanford is in Europe and likely to remain there until his friends can accomplish their work, some one who knows all the facts and has the affidavits referred to, will give the story to the public. Thus Senator Stanford will be made aware of the details of all that unfortunate affair and would undoubtedly hasten back to the United States in order to be personally assured that nothing of a crooked nature is being done by his unwise adherents during the present campaign. It seems unfortunate for California that she should be represented in the Senate by one who knew Why should an able-bodied red man be more coddled by Uncle Sam than an able-bodied white man? THERE is a good deal of building going on in Los Angeles at present in all parts of the city. Not only are fine business blocks in process of erection. but there are many handsome residences in process of erection. All of these are encouraging signs of the times, and are evidences of the faith which our own citizens have in the future of the city.

AMUSEMENTS.

GRAND OPERA-HOUSE.—Quite a good house greeted the second performance of A Pair of Jacks lost evening, and it was received with the same demonstrations of favor as the night before. The company contains several clever people, who all work in concert and help to make the piece go with a snap and swing that leaves no one a chance to get tired. Besides the former mention of some of the properties the finished stars. Desires the former mention or some of the principals, the finished singing of Miss Marie Knowles should not pass unnoticed, as also the clever comedy acting of Miss Nina Heyward, and the very droll personation by Sol Alken in his character of "Prof. Jenkins Queer."

The same programme this evening.

A Long Lane.—A Long Lane is billed as the next attraction at the Grand Operahouse, commencing Tuesday evening, July 1st. Several features in the realistic line are promised, the whole comprising a domestic comedy-drama of an attractive kind.

THE CANTATA OF ESTHER.-A third large audience filed the Congregational Church last night to witness the final presentation of Queen Esther. As predicted, the performance went off with much smoothness, the solists were well supported by the orchestra and with more stage assurance came naturally improvement in the singing itself.

Many details of dress were altered for the better, notably "Mordecai's" high hat. Several of the soloists received encores, bouquets and applause that testified to the pleasure they gave the hearers.

That the cantata attracted a large audience for three presentations shows not only that there is here a deep and sincere interest in music, but means also that Mr. Hamilton, his orchestra and his assistant gave much time and hard work to their task.

AMONG THE POLITICIANS.

The Marion Journal announces that C. P. Berry of Sutter is making a hard fight for the nomination for Governor in the Democratic convention.

The convention this afternoon nominated the following tickel: Transurer, Franz Amberg of Chicago; Superintendent of Public Instruction, Dr. Richard A. Edwards, present incumbent. Trustees of the State University were also nominated.

The platform renews its declaration in favor of a free and honest ballot and count, and recommends the enactment Chief Justice Beatty will seek redlec-tion, if he can get the Republican nom-lustion. Judge William T. Wallace wants the Democratic nomination for Chief Justice.

Chief Justice.

A Conflict of Authority Between City Council and State Courts Complicates

By Telegraph to The Times. SPOKANE FALLS (Wash.,) June 24. -[By the Associated Press.] All day long the city has been deeply excited over a conflict between the city and State authorities. A struggle has been pending for some time between the City Park Transit Company and the Spokane Falls Street Railway Company, for the privilege of laying street-car tracks on Division street. At the last meeting of the Council that body ordered both companies to tear up their tracks from the sides of the street, and gave the City Park Transit Company the privilege to lay tracks in the center of the street. The City Park Transit Company obeyed the brider, but the Spokane Falls Street Hallway Company did not, and instead obtained an injunction from the Superior Court to restrain the tearing up of their tracks.

At 4 o'clock this morning the difficulty began. A large force of laboringmen in the employ of the City Park Transit Company began tearing up the tracks of their opponents, being protected by a large force of police. Judge Kannard of the Superior Court then issued a restraining order, and Active Mayor. Payidson Street Super. d both companies to tear up their

The Senate proceeded to the consideration of the Postoffice Appropriation Bill.

In relation to the amendment of the littee, increasing the item for mail depredations, postoffice inspectors, fees and expenses from \$250,-to \$300,000, Mr. Gorman spoke in condemnation of the Postmaster-Gen-eral's plan for having additional de ectives to inquire into such small matters as whether patrons of a postoffice are satisfied that the business of the office is well performed; whether the postmaster employs members of his own family, whether intoxicating liquors are sold in a postoffice building and other matters. He objected to the proposition of the Postmaster-General and other matters. He objected to the proposition of the Postmaster-General to enter upon a system such as he suggested in the statement before the House committee of dividing the country into twenty-six districts, with chief detectives for each district, and with a corps of detectives to be used for visiting localities and getting "in touch with the people." He (Mr. Gorman) did not want any Postmaster-General to have a force under him whose avowed duty it might be to go around among the people and be "in touch with them."

Mr. Plumb also spoke against the amendment, but it was agreed to, as were other committee amendments, and the bill passed.

The Senate then proceeded to consideration of the Diplomatic and Consular Appropriation Bill. The principal amendments recommended by the committee have already been given in these dispatches.

All amendments having been agreed to, the bill passed.

Senate bills to adopt regulations preventing, and in relation to, collisions at sea, were passed. These bills embody the rules agreed to by the international maritime conference.

The conference report on the Pension Appropriation Bill was presented. The Senate receded from the only amendment not arranged in conference—that for the appointment of two additional pension agents—and the Pension Appriation Bill now gees to the President.

If speculative pools had been organized they might have been founded upon a belief in the passage of the House bill, because it opened the door to the widest speculation. One day there might be ten millions in the treasury and the next not a million. He criticised the House bill in other respects. He was for free colnage, but if he could not get it, he would vote for this bill, if he could get two amendments, one providing that the notes outstanding should not be limited to the cost price of the bullion, and the other that the notes should be redeemed in coin. This latter was important in order that the coinage should be kept up, and bullion not stored in the treasury simply as a commodity.

not stored in the treasury simply as a commodity.

Mr. Townsend of Colorado said free coinage was the only way to secure a stable financial system, but if he could not get free coinage he would vote for this four and one-half-million bill as offering considerable improvement on the present conditions.

The question was further debated by Messrs. Kerr, Post, Hill, Kelly, Struble, Wheeler and Bartine, the latter stating that he felt it his duty to vote for any measure that pointed in the direction of free silver.

There is a hophouse, 6 will feet in size, complete with kinas and press, with a capacit of 24 000 pounds per day, 15 acres in young Bartlett nears. There is also a small grove of cake on the place. The upland is well adapted to grapes, olives, figs and a linds of citrus and decideduous fruis. The place will be sold as a whole or in part, to sait purchaser. It is by all odds the most desirably located property in Yuba county, to sait purchaser. It is by all odds the most desirably located property in Yuba county. The owner has too much land and has decided to sell part of his hoding and highly-improve-the balance. There is not such another piece of land in these four counties, and those who want to secure a property that will always be among the best, should look into this. Would make four most desirable farms and could be subdivided into small lots to advantage.

and Herald hopes that it will settle down to genuine summer, and that the denizers of Los Angeles and addown to genuine summer, and that the denizens of Los Angeles and adjacent towns will roast under a tropical sun, thereby being compelled to come down by the tens of thousands. We know if old Sol will only shed his rays properly they will come, for there is only one place where all classes can be accommodated, and its name is Santa Monica. The beauty of the day and the many applicants for locations made on north beach, which is growing in popularity, made F. R. Ellissing aloud with joy and caper about like an old maid at a christening, and one tradesmen offered up thanks and carnest petitions to the clerk of the weather to let her go, Gallagher! Even sedate Dr. Cates, who was enjoying a visit at his friend's, W. T. How Seeds Are Tested.

A correspondent of the St. Louis Globe-Democrat, writing from Washington and detailing the work of the Agricultural Department in sending out seeds, says: All the seeds are tested before being sent out, and the way in which it is done is very curious indeed. Shallow tin pans half full of water are employed, and across these, parallel, are laid thick wires in pairs. Each two wires have a strip of muslin sewn between them, so that when they are laid together across the pan a fold two inches deep hangs into the water. In this fold all along from one side of the pan to the other seeds are put, and the water, rising by capillary attraction, soaks the muslin and causes the seeds to germinate. The forming roots poke their way in every direction through the muslin, and the plants grow famously. One tin pan two feet long will hold a wonderful number of sprouts, and it is a simple matter to count and find out what percentage of those put in germinate, one fold of muslin being devoted to each kind of seeds. Any seeds that do not prove entirely satisfactory are sent to the gardener of the department to be tried in earth. Thus Uncle Sam is able to guarantee all the seeds he distributes this year. The tin-pan idea is a new one. The tin pans are attended to altogether by a pretty enthusiast in petticcats, who thinks it great fun to have a whole botanical garden within half a dozen square feet of room. She does the whole business on a window-ledge, and simply in the water that way she has grown beans big enough to eat. And she ate them. Try it for yourself. Use a good-sized tin pan from the kitchen and fix wires and muslin in the way described. Write to the department for the seeds you want, and you are all ready to go into business. Own your own kitchen garden. Every city family should have one on the window-ledge. Flow-ters will do as well. How Saeds Are Tested.

A story is going the rounds of how Dr. Reid, the well-known temperance advocate, was treated to an undesired bath a few days ago, It appears

Doctor drove up to a private trough in the eastern part of town to water in the eastern part of town to water his horse. The trough belongs to a man whose ideas on the temperance question are somewhat at variance with those held by the late editor of the Standard. The Doctor was told he must go elsewhere to water his animal. But the warning went unheeded, and the Doctor held his ground. Whereupon his friend, the enemy, turned a strong stream of water, issuing from a garden hose, square on the Doctor, and he was forced to beat a hasty retreat. Dr. Reid says he likes water, but he wants the privilege of regulating the time and manner of its delivery.

NEW YORK, June 24.—The apathy continues in the stock market and today there was little animation in the regular list.
While the state of silver legislation still prevents more active speculation, there is no disposition to discount the result either way. The only marked feature of the day was sugar refineries, and it was up and down again several times over a compara-tively narrow range. The close was firm, though duil at small fractional gains in

and will be warmly welcomed by our roaders. Its author has had a long and extended ex-perience in artistic needlework, and in this volume she has carefully set forth the results

of her study and labor in this fascinating department of art. of her study and labor is this fascinating department of art.

She has illustrated her work by means of COLORED PLATES, each one of which is made directly from the piece of embroidery which it represents. On one page of the book she shows an outline pattern of the leaves, and on the opposite page is a beautiful COLORED PLATE showing the pattern as it appears after it has been properly worked. This plate shows the exact colors that were used in doing the work, and the outline pat-tern is lettered and numbered, and the author gives full directions for working the colors

There are Eight of these Colored Plates, as Follows:

Autumn Leaves, Yellow Daisies,

Golden Rod, Wild Roses, Tulips,

Morning Glories, Thistles, Pansies

Any lady can master the beautiful art of Embroidery in Colors without any other than this valuable book gives. THIS WORK IS PRINTED ON HEAVY TINTED PAPER and is bound with beautifully illuminated cover. It is such a book as ordinarilly sells in book stores for \$2, but because it is a volume especially adapted to the needs of every household we have put the price within the reach of all.
